

Event Management System — API Endpoint Plan

REST API endpoints derived from the ERD (Users, Organisers, Categories, Events, EventCategories, Enrolments, Results).

1. Auth

Method	Endpoint	Purpose
POST	/auth/register	Create a new user
POST	/auth/login	Authenticate, return JWT/session token
POST	/auth/logout	Invalidate current session
GET	/auth/me	Get currently authenticated user

2. Users

Method	Endpoint	Purpose
GET	/users	List users (paginated)
GET	/users/{userId}	Get user by ID
PUT	/users/{userId}	Update user profile
DELETE	/users/{userId}	Delete/deactivate user
GET	/users/{userId}/enrolments	Enrolments for this user (as participant)
GET	/users/{userId}/results	Results for this user

3. Organisers

Method	Endpoint	Purpose
POST	/organisers	Promote a user to organiser
GET	/organisers	List organisers
GET	/organisers/{organiserId}	Get organiser details
DELETE	/organisers/{organiserId}	Remove organiser status
GET	/organisers/{organiserId}/events	Events created by this organiser

4. Categories

Method	Endpoint	Purpose
GET	/categories	List all categories
POST	/categories	Create category

Method	Endpoint	Purpose
GET	/categories/{categoryId}	Get one category
PUT	/categories/{categoryId}	Update category
DELETE	/categories/{categoryId}	Delete category
GET	/categories/{categoryId}/events	Events tagged with this category

5. Events

Method	Endpoint	Purpose
GET	/events	List/search events (filter by date, location, category)
POST	/events	Create event (organiser only)
GET	/events/{eventId}	Get event details
PUT	/events/{eventId}	Update event (owning organiser only)
DELETE	/events/{eventId}	Delete event
GET	/events/{eventId}/categories	Categories linked to event
POST	/events/{eventId}/categories	Link category to event
DELETE	/events/{eventId}/categories/{categoryId}	Unlink category from event
GET	/events/{eventId}/enrolments	List participants enrolled
GET	/events/{eventId}/results	Leaderboard/results for event

6. Enrolments

Method	Endpoint	Purpose
POST	/enrolments	Enrol a participant in an event
GET	/enrolments/{enrolmentId}	Get single enrolment
PUT	/enrolments/{enrolmentId}	Update enrolment (e.g. status)
DELETE	/enrolments/{enrolmentId}	Cancel/withdraw enrolment
PATCH	/enrolments/{enrolmentId}/status	Transition enrolment status

7. Results

Method	Endpoint	Purpose
POST	/results	Record a result (organiser/admin only)
GET	/results/{resultId}	Get single result

Method	Endpoint	Purpose
PUT	/results/{resultId}	Correct a result
DELETE	/results/{resultId}	Remove a result
